ABOUT ME

"As an experienced Mobile Developer and Project Manager with a background in both Android (3+ years) and React Native (1 year), I specialize in creating dynamic, user-friendly applications utilizing modern architectures such as MVVM and MVI. My expertise extends to AI integration in mobile apps, enhancing both functionality and user experience through innovative solutions.
Beyond development, I lead projects and cross-functional teams, ensuring timely and quality-focused outcomes aligned with client expectations. As a Project Manager, I bridge the gap between technical and business needs, optimizing project workflows and fostering team productivity. I am also passionate about sharing knowledge and mentoring aspiring developers, providing guidance and practical insights to students in development fundamentals and advanced mobile technologies.
Dedicated to continuous learning and innovation, I strive to push the boundaries of mobile development and contribute to impactful projects that drive user engagement and satisfaction."

WORK EXPERIENCE

Mobile application developer

Zubair Shafi [31/05/2022 – Current]

City: Sargodha | **Website:** www.enfotrix.com | **Email address:** Enfotrix@gamil.com | **Name of unit or department:** Software development company - **Business or sector:** Other service activities

Project Management: Lead diverse development projects from initial concept to final deployment, managing agile workflows and team collaboration to achieve timely, high-quality results.
Training & Mentorship: Conducted comprehensive Android development training sessions for the past two years, guiding students through advanced mobile technologies and real-world project implementation.
Key Projects:
  • **University Chatbot System:** Developed a conversational AI chatbot to assist students with real-time access to university information, enhancing engagement and improving responsiveness.
  • **School Management System:** Created a comprehensive school management platform that includes attendance tracking, student record management, and an administrative app for principals.
  • **Pharma Management System:** Built an end-to-end pharmacy management app featuring inventory control, prescription tracking, and patient data management, streamlining pharmacy operations.
  • **Maize Disease Detection Application:** Leveraged machine learning for a disease detection app that helps farmers identify maize diseases early, enabling proactive crop management.
  • **Cric Dex:** Designed a cricket-focused app providing real-time match data, player stats, and analytical insights through API integrations.
  • **Language Learner App:** Created an interactive language learning app featuring AI-based translation and pronunciation feedback to help users acquire new languages.
  • **Tourist Management System:** Developed a tourist management solution with personalized itineraries, location-based recommendations, and real-time travel support.

- **Roshan Dastak Investment Platform:** Developed a financial investment platform for *Roshan Dastak*, enabling investors to contribute funds, track investments, and receive distributed profits. This software streamlines fund management and profit-sharing, offering a user-friendly interface for investors.
- **Life Changer Investment Platform:** Built a similar investment platform for *Life Changer*, where investors can deposit funds, monitor returns, and receive profit distributions. The software provides transparency in investment tracking, contributing to investor satisfaction and engagement.
- **Inner Bless Healthcare App:** Created a doctor appointment management app, *Inner Bless*, facilitating efficient scheduling, communication, and patient management for healthcare providers.
-
